SAVE TIME WITH SURE-FITTING AM PARTS!

Javelin - AMX RALLY PAC

For those sports car "buffs" who have Javelins or AMX's but want to get a little extra sports car feel and "look"—sell them this accessory Rally Pac:

- Tachometer (standard on AMX)
- Engine Gauge (Oil Pressure and Ammeter)
- Electric Clock

They're easily installed and put extra money in the service till.

A GO-GO PROFIT MAKER!

COMPLETE PARTS—IMMEDIATE DELIVERY!

TACHOMETERS

Both top-of-panel-mounted and the new "in-dash"-mounted AMX/Javelin Tachometer are available. In addition to being sporty, tachometers help a driver achieve the optimum in performance while shifting gears without overspeeding his engine. A very popular accessory—stock and sell it to your AM customers.

Engine

POWER 8 FOR '68

**tailored to the
customer's
individual taste
and choice!**

American Motors lineup of engines for 1968 covers a wide range of power options—from the thrifty "199" six, standard on the American, (base and 440) to the very latest "390" V-8, available on the new AMX, Javelin SST, Ambassador SST and Rebel SST. These Torque-Command (6) and Typhoon (V-8) power plants are high-performing, smooth-operating and tailor-made to fit all manner of drivers and tastes.

FOR MORE

ERI

High-Performance **REAR TRACTION BARS**

(Torque Link Kit)

Available for Javelin and American owners. This equipment is standard on all AMX sports cars. Rear traction bars help to eliminate rear axle "power-hop" which sometimes occurs when cars are accelerated under maximum power.

INSTALLATION INSTRUCTIONS: Load the trunk of the car until a 5 $\frac{1}{16}$ " (AMX, 6 $\frac{1}{16}$ "") height is obtained between the top of the axle tube and the bottom of the body side sill. With the car in this loaded position, install the torque link, spacers and bolts and tighten to 100 foot pounds torque.

AMERICAN MOTORS

PERFORMANCE OPTIONS

and other equipment you can sell to many of your AM customers!

American Motors is widening its influence on the motoring public—performance options to please the most exacting!

Starting with the Javelin (introduced last fall) American Motors has been tagged by the groovy set and young adults as a “swinging” outfit. And to further this image, last month came the AMX, the personal sports car for the sports buff “who really cares.”

Thousands of people have already visited American Motors just to see this “dream” car with such “touches” as the production number *set in the dash* and the Space-Saver Spare (when you need it—wh-oo-shhh—it inflates).

To complement the excitement of the AMX, there's a whole new array of *performance options* and equipment for *all* American Motors cars—Ambassador, Rebel, Rambler American and Javelin. If you have performance-minded customers you think you can *sell*—why not study these next few pages carefully.

*(Be sure to call on us (by phone or in person) for
any technical assistance or further information
on these performance items.)*

SELL SAFETY—IT PAYS OFF BOTH WAYS!

HIGH-PERFORMANCE KITS

Here's a high-performance camshaft kit that will make a big hit with performance buffs young and old. Fits all AM V-8 engines. A package you can make money on. Let us show you how!

Typhoon High-Performance Kits

- **High-Performance Camshaft Kit** (shown above) fits all Typhoon V-8 engines (290, 343, 390) provides increased horsepower and torque, permits higher engine speeds. Includes a high-lift, long-duration camshaft, competition-type hydraulic lifters, stronger valve springs with dampeners. To obtain full power increase, dual exhausts and exhaust "headers" are recommended when using this racing-type cam.
- **Cold Intake-Manifold Conversion Kit** includes a special heat-blocker gasket which increases power through greater density of the cooler fuel-air mixture.
- **Special Ratio Rear Axle Kits** include ring and pinion gears plus all necessary hardware to convert to a higher ratio, permitting extra performance obtainable at higher engine speeds. Ratios available now are 4.44:1 and 4.10:1 (3.73 and 3.91 available soon).

WE'RE AS NEAR AS YOU

"More Fringing"

with the
hottest
sports car
ever!

Performance-minded car enthusiasts have been dreaming about an exciting, sporty car like the AMX for a long, long time.

For the very *first* time, here's a first-choice personal car with the design, fit and *feel* to deliver legitimate sports car satisfaction at a price within the reach of the average "dreamer."

With its long hood and abrupt rear deck—total car length, 177.2 inches—this two-seater has forward-thrusting lines that truly suggest p-o-w-e-r—a wide-track stance comparable to much larger cars—with a pert wheelbase of only 97 inches!

Bred from the exciting original "AMX idea car," the AMX has that *masculine* look which is so much a part of modern sports car styling. It has all the mechanical and equipment features you'd expect in a true sports car: Powerful engines (V-8's only)!

Special suspension (including rear traction bars) | High performance tires | Floor-mounted 4-speed transmission | Integral tachometer!

Inside the beautiful body are other wonderful features: Reclining slim-sectioned bucket seats! Carpeted storage area behind the seats! Trunk of nearly 10 cubic feet, with a space-saver collapsible spare tire! A yawning 19-gallon gas tank! Getting excited? Here's more: Deep-sectioned bumpers! Flow-through fresh air ventilation! Large, frameless side windows without vent windows for an "open-air" look! Smoother contoured outside door handles! Unique, preset-impulse door lock system! Features absent in most other sports cars! And a host of safety innovations!

The new high-performance 390 cubic inch V-8 engine introduced as an option on the AMX is the highest displacement engine ever offered by American Motors. This new free-breathing engine delivers 315 horsepower at 4600 RPM! *Standard* is a hefty 290 cubic inch 225 horsepower V-8 while another option is the zippiest 343, 280 horsepower V-8. All have four-barrel carburetors!

There's only a limited number of AMX's being made. So, we suggest if you want to see something really *special*...

February 1, 1968

Performance Bulletin AM-68-5
Z-68-5

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: AM CONTINGENCY CASH AWARD PROGRAM
for DEALERS and PRIVATE OWNERS

American Motors is engaged in sponsoring and conducting several race car programs on a national scale plus other related programs, all at no expense to AM Dealers. American Motors recognizes the fact that AM Dealers and private owners also wish to compete in various racing activities of their own on a local basis. Recognizing this, American Motors has chosen to establish a 1968 policy to pay for results, rather than pay for sponsorship.

The Contingency Cash Award Program for 1968 is an incentive program that acknowledges competition results of race cars sponsored by Dealers, Dealer Associations and private owners. The cash awards for competition race results will apply to any year and any model of an American Motors automobile with an AM-powerplant, and also for AM-powered special race cars, entered in officially-sanctioned racing events as follows:

1. NHRA World/National/Division "Championship Series" Drag Meets.
2. AHRA World/National/Division "Championship Series" Drag Meets.
3. SCCA Trans-American Sedan Races
4. SCCA U.S. Road Racing Championship Races
5. SCCA National Championship Races
6. NASCAR Grand Touring Races
7. NASCAR Grand National Stock Car Races
8. USAC Stock Car Division Races

Tentatively Planned
Subject to Change
Details to Follow

I'm sure you would agree it would be unwise and unfair of us to offer "behind-the-scenes" sponsorship to only a few selected dealers or individuals, and not offer the same privileges to all others. In other words, we simply could not operate an open policy of sponsorship for all requests since our resources are limited within the performance activities department.

Carl Chakmakian, Manager
Performance Activities

AMERICAN MOTORS CORPORATION

INTERDEPARTMENTAL LETTER

DENVER

To ALL ZONE WAREHOUSE MANAGERS
 From B. P. Herrmann
 Subject Price of High Performance Rear Axle Gear Sets

Date August 13, 1968
 Location 8 37 AM '68
 Extension Automotive Parts - Milwaukee 220

On July 30, 1968 a price change became effective on the subject parts increasing the dealer net price from \$66.00 to \$83.10. This large price increase caused many complaints from dealers and has prompted us to review these prices.

It has been our practice to price high performance parts at a much lower markup from cost than normal parts in order to promote racing with our cars. In a few cases where costs are exorbitant, prices are set to recover costs with no margin of profit.

When the \$86.00 dealer net price was established for the high performance rear axle gear sets, it was based on an estimated cost received from our Kenosha production plant. Their actual costs turned out to be much higher, necessitating the increase to \$83.10 dealer net which just barely covered cost. However, upon further review it was decided to lower the prices effective August 14, 1968, as follows:

<u>Suggested List</u>	<u>Dealer Net</u>
\$130.00	\$78.00

The following part numbers are involved:

320 8551	448 5749
320 9854	448 5750
320 8546	448 6587

You may issue credit to any dealers who were billed \$83.10 between July 30th and August 14th, and request credit from the Parts Plant.

The new prices will appear in the next Price List which will be published October 1, 1968, but, as stated above, become effective August 14, 1968.

AMERICAN MOTORS SALES CORPORATION

14250 PLYMOUTH ROAD • DETROIT, MICHIGAN 48232

February 1, 1968

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: PERFORMANCE ACTIVITIES FOR 1968

American Motors Corp. elected to become officially involved in the various fields of automobile racing by the establishment of a performance activities department in September 1967.

American Motors is not out to establish itself as having the most or the biggest racing program. We simply can't afford to do so. Instead, we are aiming to have the best racing program!

American Motors will be increasingly active in selected areas of competition where company resources and abilities will allow the opportunity to make creditable showings. With this in mind, we will not participate in a large variety or a large scale of racing programs.

There are a great many company, dealer and individual racing programs that we could sponsor and become involved with, but to do so, would simply scatter and spread thin our established resources and abilities to a point where none of the major programs would have enough support. This would naturally prevent us from concentrating on selected programs with the goal to achieve the best results possible for the time and money spent.

The AM performance activities programs and policies that are now in effect for 1968 are explained in the enclosed sections of this book.

I know you will be interested in the next page!

Front cover photo: Doug Thorley, (right) President of Doug Thorley Headers, poses with newly announced hot shoe team for American Motors' Funny Car entry, "Javelin I". In the cockpit is "Stormin Norman" Weekly, internationally famed NHRA record holder, who looks to new trophy-grabbing ET's during the hot '69 campaign. Keeping the \$13,000 S/XS blowing cool fuel are pro mechanics Glen Okazaki (left) and John Haven.

DOUG THORLEY TALKS HEADERS

Doug Thorley, President of the world famous Doug Thorley Header product line, is also internationally honored NHRA Driving Champion.

Behind each Doug Thorley Header stands endless months of Laboratory Research and Development; designing, engineering, machining, detailing; in-house dyno calibrating and performance testing on drag strips at speeds in excess of 200 mph.

The result is improved routing of the exhaust gasses from the exhaust ports, which in turn makes for increased horsepower and engine efficiency throughout the rpm range.

A recent national research study puts the Doug line of headers in the No. 1 spot ahead of all manufacturers. We're proud, too, that most of the "name" drivers run exclusively on our headers, and that pretty well tells you about our quality and performance capabilities.

Don't be satisfied with substitutes. The original and famous Doug Thorley Headers are honestly priced and shipped complete. No gimmicks. No optional components to buy.

A PREVIEW OF

1969

THE ALL NEW *XP Javelin* PACKAGE

An ALL NEW mid-year prestige package is now available to all *JAVELIN* buyers from DLR Engineering. The XP dress-up kit adds a distinctive new look to an already sporty coupe. As a dealer installed option, the XP Kit gives the *JAVELIN* that low, sleek race car look that is in keeping with the modern day automotive design. Included in the XP Kit are:

FIBERGLASS HOOD— with functional air intakes when unblocked, or when left covered continues to add a low and wide hood scoop treatment.

FIBERGLASS SPOILER— complete with rear fender end caps, this addition not only adds to the appeal of the *JAVELIN*, but also is functional at increased speeds and winds. As with the hood, the spoiler combination flows with the original *JAVELIN* body lines.

RACING TYPE WHEELS— five wheels add luster and beauty to the overall appearance of the XP package.

ALL WOOD STEERING WHEEL— makes driving a pleasure with the sure grip for handling and comfortable, smooth feel of the road. A racing designed wheel insures quality and beauty to the drivers compartment.

XP EMBLEMS— add distinction to the XP Kit, setting it apart from all other sports type automobiles.—a sure indication of a discriminate buyer.

The XP Kit is available from **AMERICAN MOTORS DEALERS** only. Designed and produced by:

DLR Engineering
7936 Firestone Blvd.

AMERICAN MOTORS 290-390 Fuel Injection

290 - 390
AMERICAN MOTORS KIT
Net Price \$ 350.00

COMPLETE RACING KIT

\$390⁰⁰

Kit includes:

- Injector with all bypasses and idle valve
- One piece spun aluminum ram tubes available in lengths from 5" to 16"
- Filter-Valve (shutoff valve and fuel filter combination)
- Timing belt pump drive
- 80A fuel pump
- All fuel lines including 3/4" inlet hose and fuel tank outlet fitting. The return line hose is not included but can be ordered, made to your specific length.

SPECIFICATIONS

Butterfly diameter	2.44"
Overall height	6"
Weight (injector only)	22 lbs.
Injector casting — aircraft quality 319 aluminum	

ACCESSORIES

Bypasses (each)	.60
Extra nozzles (set of 8)	33.00
Spark plug cleaner 16 oz. aerosol can	3.75
Degummed castor oil (for fuel pumps) 1 qt.	3.00
Nitro analyzer kit	36.00

FROM 15 YEARS AGO COMES THIS ORIGINAL AD. IT WAS FOUND IN A PARTS BOOK AT THE DENVER ZONE NOVEMBER 1983. THESE UNITS ARE EXTREMELY RARE. THIS EDITOR HAS SEEN ONLY ONE IN THE FLESH EVER! BETCHA THIS COULD MAKE YOUR AMC V-8 FLY.

PARTS DISCOUNT PROGRAM FOR DEALERS!

20% DISCOUNT (based on dealer net cost) ON ALL AM PARTS

(Regular parts and "Group-19" hi-performance parts)

ordered by AM dealers in the U.S.

who are currently sponsoring or

cosponsoring competition race cars

at rally events in their communities.

To qualify for the 20% parts discount program, and to assure that the ordered parts will be used for competition race cars only, the following steps must be taken:

1. The Dealer may use any present order form and print in a bold, prominent manner . . . "RACE CAR PARTS."
2. The Dealer or his Parts and Service Manager must sign the order form.
3. Written order form must be submitted by the Dealer via normal channels to the Zone Office. Phoned-in orders are acceptable in case time is a problem.
4. Orders must have an approval signature from the Zone Parts and Service Manager or District Manager.
5. Upon receipt of such Dealer orders, the Zone translates the order on a standard F9800 order form, and then marks the top of the order form "RACE CAR PARTS," indicating the 20% discount in the appropriate place below. The 20% discount does not apply to shipping/insurance charges.
6. The present 5%, 7½% and 10% discounts continue to be in effect, but these discounts naturally *do not* apply if the 20% discount for race car parts is applied.

SAVE! SAVE! SAVE!

Get youthful and young adult PRODUCT EXPOSURE!

LOOKING FOR A BUSINESS-GETTER?

Javelin
**GO
PACKAGE**

- 280 HP 343 CID V-8 engine
- Dual Exhaust System
- Power Disc Front Wheel Brakes
- E70-14 Red-Line Wide Profile Tires
- Handling Package consisting of larger diameter front sway bar, heavy-duty springs and shock absorbers, and 5½" rim-width wheels
- "Rally" Stripes on side (in place of thin line stripes).

A real money-maker special for your dealership!

For the performance-minded Javelin buyer—here's another "GO" package that is available as an option. It's got *everything!*

SELL IT STRONG!

High-Performance REAR TRACTION BARS

(Torque Link Kit)

There's a growing market for this new, high-performance Rear Traction Bars option (Torque Link). The equipment is standard on all AMX cars, as you know, but it's also available for Javelin and American owners who want that *little extra* get-up-and-go power. Javelin Kit (#4485582). American Kit (#4485753).

LOAD LEVELERS

For unusually heavy loads and driving those rough roads. Easily installed in place of rear shocks. Load levelers provide a *controlled* ride even when traveling *light*. Push this performance item and profit. There's a good demand!

DUAL EXHAUSTS

Cash in on "dual exhaust" interest *now* by aggressively promoting it to selected customers. Conversion parts are available for all V-8 engines but not available on station wagons or the American Series. Be ready when customers ask about "dual exhausts." Refer to your R-14067 Parts Catalog—it lists all components to make a conversion to "duals."

High-Performance AXLE COMPONENTS

For 290, 343 and 390 V-8's

High-Performance ENGINE COMPONENTS

For 290, 343 and 390 V-8's

High-Performance INTAKE MANIFOLDS

For 290, 343 and 390 V-8's

1. American Motors cast-iron 4-barrel manifold for the 290 and 343 V-8's (standard on 390 V-8).
2. For all V-8's, a new high-riser aluminum intake manifold (by "Edelbrock"), plus the "Holley" 3-barrel carburetor (950 cubic feet/minute), is also available for even greater performance with the:

#4485731 KIT (manifold, carb., misc. parts)

#4485729 manifold and misc. parts

#4485730 Holley 3-barrel carburetor

and PROFIT

Items Every Chance You Get!

HIGH-PERFORMANCE KITS

Here's an attractive package for those youngsters and young oldsters who want more "zip" from their cars. Fits all your AM Typhoon engines—V-8's, that is. Plenty of show and glow with these go-go kits. Be ready with all the *answers* for those interested.

Typhoon High-Performance Kits

- High-Performance Camshaft Kit (shown at right) fits all Typhoon V-8 engines (290, 343, 390), provides increased horsepower and torque, permits higher engine speeds. Includes a high-lift, long-duration camshaft, competition-type hydraulic lifters, stronger valve springs with dampeners. To obtain full power increase, dual exhausts and exhaust "headers" are recommended when using this racing-type cam.
- Cold Intake-Manifold Conversion Kit includes a special heat-blocker gasket which increases power through greater density of the cooler fuel-air mixture.

- Special Ratio Rear Axle Kits include ring and pinion gears plus all necessary hardware to convert to a higher ratio, permitting extra performance obtainable at higher engine speeds. Ratios available now are 4.44:1 and 4.10:1 (3.73 and 3.91 available soon).

Check "Group 19" in AM Parts Catalog for complete information.

Top-of-panel-mounted
and the new "in-dash"-mounted

TACHOMETERS

Tachometers help a driver achieve the optimum in performance while shifting gears—without overspeeding of his engine. A very popular accessory—sell it strongly to your customers.

TRANSMISSION NOTE:

The current factory all synchromesh 4-speed Warner T-10 gear box (AM #3188928) has a 2.64:1 first gear ratio. *Now* in production is a *new* 2.23:1 first gear with follow-up close ratios transmission (AM #3193964).

Here's the current and the *new* gear box lineup:

	Current AM #3188928	New AM #3193964
1st	2.64	2.23
2nd	2.10	1.77
3rd	1.46	1.35
4th	1.10	1.00
Rev.	2.55	2.16

By Stressing These "Performance

American Motors

AIR LIFT AIR SPRINGS

Profits are in the *bag* when you install AM Air Lifts in your customers' cars. Made of tough butyl cylinders, these air cells inside the rear coil springs are completely adjustable for any load or road condition. Who needs them? Salesmen! Campers! Sportsmen! Trailer Haulers! Performance Buffs! Model application: Kit No. 8992349 for Rebel and Ambassador Sedans. Kit No. 8992350 for Rebel and Ambassador Station Wagons.

- Equalize Rear Wheel Traction
- Give Maximum Acceleration
- Improve stability and passenger comfort
- Keep cars at their *level* best always.

**LET YOUR CUSTOMERS KNOW YOU CAN INSTALL
AMERICAN MOTORS AIR LIFT AIR SPRINGS!**

Javelin **RALLY PAC**

For those sports car "buffs" who have Javelins or AMX's but want to get a little extra sports car feel and "look"—sell them this accessory Rally Pac:

- Tachometer (standard on AMX)
- Engine Gauge (Oil Pressure and Ammeter)
- Electric Clock.

They're easily installed and put extra money in the service till.

**A GO-GO
PROFIT MAKER!**

AMX CAN BUILD FOR YOU...

• PERFORMANCE PARTS • HIGH-PROFIT ACCESSORIES

WIN

more service and parts sales by letting these new and regular customers know the *complete* services you offer. Right now—motorists are in need of tune-ups, wheel alignment and brake services to name a few. Take advantage of the extra traffic AMX is sure to bring to your dealership—cash in by offering “Specials.”

PLACE

your accessories board near your service entrance and, if possible, another accessories display in your showroom so that visitors viewing the new AMX sports car will be readily exposed to them. *Sell* shock absorbers, comfort and convenience items like tissue dispensers, litter baskets, stereo tape players, wheel discs, station wagon and sedan luggage carriers, etc.

SHOW

the *new* and *regular* customers entering your showroom and service areas that you are earnestly interested in *their* business—that you have the factory-trained mechanics to take care of their every need—that your service labor prices are *competitive* in every degree. It will pay off for you—*right across the board!*

AMBASSADOR • REBEL • RAMBLER AMERICAN • JAVELIN • AMX

Take advantage of the **SERVICE DEPARTMENT TRAFFIC**

• NEW CUSTOMERS • SERVICE LABO

RIGHT ACROSS THE BOARD!

American Motors dealers never had it so good! The new and sensational AMX sports car is a traffic-builder as never before. Scores of *new* faces will be peering through your showroom windows—"spec" questioning your salesmen in earnest—getting to know your facilities. Not to mention your *regular* customers—they'll really be excited!

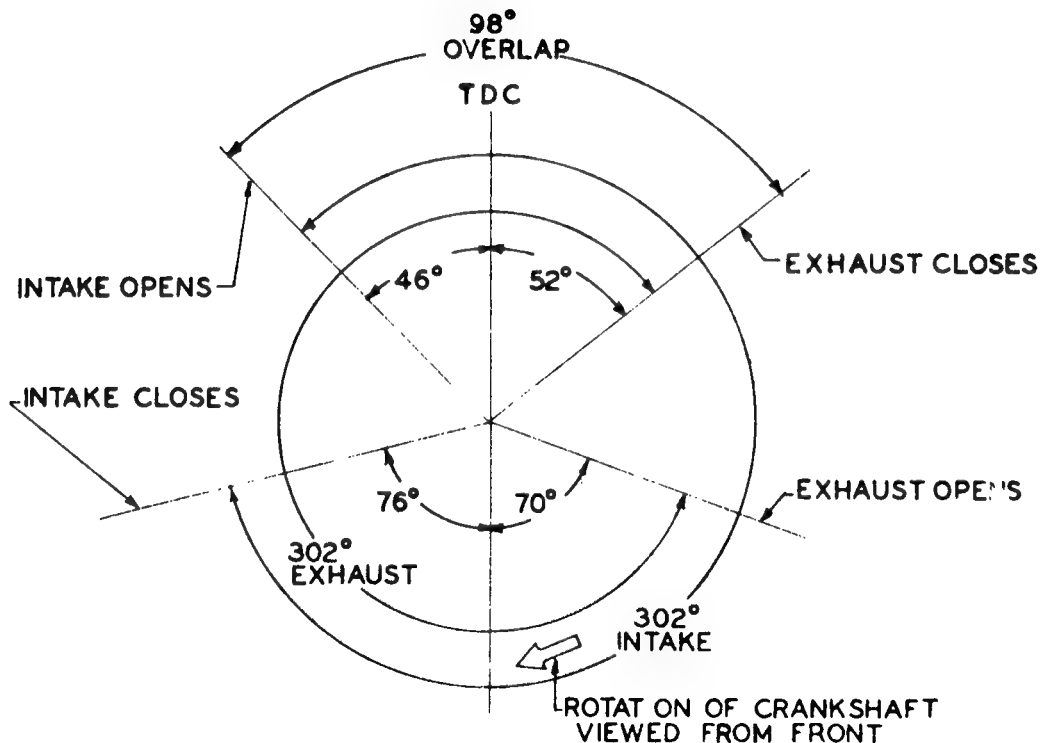

FIGURE 3. . . VALVE TIMING DIAGRAM (CRANKSHAFT DEGREES)

30. Install radiator, connect hoses, refill cooling system.

31. Preliminary Hydraulic Tappet Adjustment.

Turn engine clockwise by hand, using a socket and wrench on the damper retaining bolt until number one cylinder (first on left bank) is in firing position T.D.C.

NOTE: Set distributor to approximately #1 firing position.

Adjust the following intake valve rocker arm nuts until the push rods have a slight friction drag when turned. Cylinders 1, 2, 5, 7, and exhaust valve rocker arm nuts 1, 3, 4, 8.

Turn engine as above until number 6 piston is in firing position T.D.C. Adjust the following intake valves as above, cylinders 3, 4, 6, 8, and exhaust valve rocker arm nuts 2, 5, 6, 7.

32. Start engine allowing for normal operating temperatures, while operating inspect for signs of oil or coolant leakage.

CAUTION: Do not idle engine in drive positions (automatic) for periods over two minutes.

After operating temperature is attained adjust timing from T.D.C. to 8 B.T.D.C. to suit fuel and/or the type of driving anticipated.

IMPORTANT:

The idle speed must be below 650 R.P.M. and the vacuum advance hose disconnected from the distributor or carburetor when setting ignition timing.

33. Final Tappet Adjustment.

With the engine operating loosen one rocker arm stud nut at a time until a slight noise appears, tighten slowly until noise disappears, then tighten nut 1/4 turn additional.

Follow the above steps on each rocker arm.

34. Install cylinder head covers with new gaskets.

23. Prior to installation of the front cover, remove the lower dowel pin from the cylinder block.

IMPORTANT:

The dowel pin is required for correct cover alignment and must be either reused or a new replacement dowel installed after the cover is in position.

Using a sharp knife or razor blade, cut the oil pan gasket flush with the cylinder block on both sides of the oil pan.

Cut corresponding pieces of gasket from the replacement oil pan gasket set. Cement the gasket to the cover. Install the replacement front "Neoprene" oil pan seal into the cover and align the cork gasket tabs to the pan seal.

Apply a strip of "Permatex #2" or equivalent to both the cut-off oil pan gaskets at the oil pan to cylinder block location.

Place the cover into position, install the oil pan bolts into the cover, tighten evenly, and slowly until cover aligns with the upper dowel. The cover should now be in the correct position. Install the lower dowel through the cover. Drive dowel into corresponding hole in the cylinder block. Install the cover to cylinder block bolts. Tighten to 20-30 Foot Pounds torque.

Install damper, damper hub, belts, etc.

24. Install the hydraulic valve tappets (furnished in kit) lightly oil each before installation.
25. Install push rods (furnished in kit) make certain push rods are seated correctly in tappets.
26. Install rocker arms, ball seats and stud nuts in their original operational position DO NOT TIGHTEN STUD NUTS.
27. Install new intake manifold gasket and manifold end gaskets (not furnished in kit), place "Permatex #3" or equivalent on both sides of the gasket at port areas. Make certain that the four corner hole flanges of the gasket are firmly seated in the bolt holes. Place "Permatex #2" or equivalent on each end seal at the point where the intake gasket contacts and forms a seal.
28. Install the intake manifold carefully so as not to dislodge the gasket flanges as stated above.
29. Tighten the manifold bolts crisscrossing from bank to bank to 40-45 Foot Pounds torque.

21. Install the timing chain and sprockets.

The correct valve timing is established by the relation between the sprocket on the camshaft and the sprocket on the crankshaft.

To obtain the correct valve timing, index the "0" marks on camshaft and crankshaft sprockets on a line drawn vertically through the center line of each shaft (Fig. 1).

To check the assembly, rotate the crankshaft until the timing mark on camshaft sprocket is on a horizontal line at either the 3 or 9 o'clock position. Count the number of links or pins on the timing chain between timing marks. There should be 10 links or 20 pins between timing marks. Each link contains two pins (Fig. 2).

Figure 2
Link Count
Position

22. Install the fuel pump eccentric, eccentric spacer, oil pump-distributor drive gear, flat washer, and bolt.

IMPORTANT:

The fuel pump eccentric spacer must be installed with the word **FRONT** facing the distributor drive gear.

Tighten the distributor drive gear retaining bolt to 25-35 Foot Pounds torque.

15. Install the rocker arm studs (furnished in the kit) into the cylinder heads.

IMPORTANT:

Tighten the studs into the cylinder head to 65-70 Foot Pounds torque.

16. Remove Valve Springs.

IMPORTANT:

It is not necessary to remove the cylinder head in order to remove valve springs. First remove the spark plugs from the cylinders and insert a 14 mm. thread size adapter.

NOTE: This adapter can be made from the body of a spark plug from which the porcelain has been removed and an air hose connection threaded into the body of the spark plug.

Maintain air pressure above 90 lbs. in the cylinder while the valve springs are being removed. The air pressure will hold the valve against the valve seat so that the valve lock and the upper retainer can be removed.

17. Original valve springs, valve locks (keepers), upper retainers and oil deflectors will not be reused with this kit.
18. Install the oil deflectors, valve springs (with dampers) upper retainers and valve locks. (Furnished in kit).

CAUTION: Valve Spring Position

When installing valve springs, it is important that the closely coiled end of the spring be installed to the cylinder head.

19. Remove woodruff keys from original camshaft and install in new shaft.
20. Install the camshaft into the cylinder block. The camshaft should be oiled for initial lubrication.

8. Remove rocker arm studs from cylinder heads. (Will not be reused with kit.)
9. Remove lower and upper radiator hoses from engine, disconnect transmission cooler lines if so equipped, remove radiator.
10. Remove distributor, fuel pump, alternator drive belts, fan and hub assembly, vibration damper hub and vibration damper using J-21791 Fuller.

It is not necessary to disconnect power steering or discharge the air conditioning system, if so equipped. Remove the units from their mounting bracket(s) and place aside while performing this operation.

11. Remove the two front oil pan bolts and the 8, 9/16" hexagon head bolts retaining the cover to cylinder block.

Remove cover by pulling forward until cover is free from locating dowel pins.

12. Rotate crankshaft until timing marks on sprockets are in a vertical line adjacent to each other (Fig. 1).

Figure 1

13. Remove the bolt from the distributor drive gear. Remove the gear, fuel pump eccentric spacer, eccentric, camshaft sprockets and chain.
14. Remove the camshaft as far as possible. The camshaft may contact the hood lock support bracket preventing complete removal.

In this case, it will be necessary to shift the position of the This may be accomplished by disconnecting the engine mount at transmission and moving the transmission in the direction re

TO Those Concerned

LOCATION

FROM R. J. Swaim

LOCATION—EXT. Performance Activities
2677SUBJECT Race Parts Discount Program

DATE

December 1, 1972

The attached letter announcing the reinstatement of the subject program for AMC dealers, and including Jeep dealers for the first time, was mailed this date.

The objective of this program is to encourage and assist dealer involvement in local racing activities as a means of increasing both product and dealership exposure. This can usually be accomplished by dealers if they pass the discount on to a competent racer in exchange for dealership identification on the race vehicle.

Your assistance in encouraging your dealers to take advantage of this program is requested.

Should any questions arise concerning this program, or racing in general, please contact this office.

Bob Swaim

POLICY CONCERNING RACING BY INDIVIDUALS, DEALERS & ASSOCIATIONS

During the past year or so, there has been a sharp increase in the number of individuals, dealers and in some cases, dealer association groups, that have been (or will be) engaged in local racing activities to promote the sale of cars.

American Motors fully encourages these racing activities, which are at the discretion, responsibility and sponsorship of the respective individuals, dealer(s) or groups.

To help support outside racing activities, a new "Contingency Cash Award" program, plus a new "Parts Discount" program have been instituted, as explained in the enclosed sections of this book.

The performance activities office at American Motors stands ready to counsel, advise and answer questions from these participating people. In some cases, dealers and groups are directly sponsoring local racing enthusiasts who are already specialized and experienced in race car preparation and campaigning.

American Motors could not begin to offer sponsorship for individual requests, including dealers and dealer groups because of sheer volume of such requests. For this reason, individual requests for sponsorship should be re-directed to dealers or dealer groups.

As evidenced by the magnitude of the various performance activities that AM is sponsoring to help benefit all dealers, it is simply not possible to sponsor individual requests, including dealers, in view of the resources and funds available.

Very truly yours,

Carl Chakmakian, Manager
Performance Activities

AMERICAN MOTORS SALES CORPORATION

14250 PLYMOUTH ROAD • DETROIT, MICHIGAN 48232

February 1, 1968

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: PERFORMANCE ACTIVITIES BOOK

In September 1967, American Motors announced the formation of the Performance Activities Department. The purpose of this department is to conduct special racing programs for American Motors. Since September, we have developed a set of procedures, policies and programs to implement our racing programs.

This book explains all of these procedures, policies and programs so that you may be able to answer any and all questions your customers may have relative to our racing program; and so that you may realize how you can participate on a local basis, and thereby augment our major racing efforts which are on a national scale to help stimulate sales for all dealers.

This book is designed to be a permanent reference file for you. We urge you to review the contents carefully. It will be updated as policies change, as new programs are developed and as results of the efforts we are already engaged in become available.

Contact Mr. Carl Chakmakian, Manager of Performance Activities, if you need more information. He will be most happy to assist you in any way he can.

Sincerely

E. C. Schoenleb
Director of Merchandising
Automotive Division

AMERICAN MOTORS SALES CORPORATION

14250 PLYMOUTH ROAD • DETROIT, MICHIGAN 48232

February 1, 1968

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: PERFORMANCE ACTIVITIES FOR 1968

American Motors Corp. elected to become officially involved in the various fields of automobile racing by the establishment of a performance activities department in September 1967.

American Motors is not out to establish itself as having the most or the biggest racing program. We simply can't afford to do so. Instead, we are aiming to have the best racing program!

American Motors will be increasingly active in selected areas of competition where company resources and abilities will allow the opportunity to make creditable showings. With this in mind, we will not participate in a large variety or a large scale of racing programs.

There are a great many company, dealer and individual racing programs that we could sponsor and become involved with, but to do so, would simply scatter and spread thin our established resources and abilities to a point where none of the major programs would have enough support. This would naturally prevent us from concentrating on selected programs with the goal to achieve the best results possible for the time and money spent.

The AM performance activities programs and policies that are now in effect for 1968 are explained in the enclosed sections of this book.

I know you will be interested in the next page!

AM-SPONSORED PERFORMANCE ACTIVITY PROGRAMS for 1968

1. JAVELIN/TRANS-AM: American Motors, through the Javelin Racing Team, is sponsoring the building and campaigning of two Javelins in the 1968 Trans-American championship road racing circuit of SCCA (Sports Car Club of America). This extremely competitive class of racing will put the Javelins on the road racing courses starting with Sebring, Florida on March 23, 1968 followed by 10 to 12 races across the country.

Preparation and maintenance of the competition Javelins is handled by Ronnie Kaplan Engineering of Chicago, while engine development is by Traco Engineering of Los Angeles. Jim Jeffords of Milwaukee will act as manager for Javelin Racing Team, Inc.

Since this class of racing is limited to engines under 5 liters (305 cubic inches), the basic AM 290 CID V-8 will be used. SCCA has permitted a piston bore increase to achieve a displacement under 305. Therefore, the stock 3.75" bore will be increased to 3.842" with a resultant displacement of 304.3 cubic inches. This will be the size of Traco-prepared engines used for the Javelins by the Javelin Racing Team. Since the rules permit any type piston, the new larger size pistons made by Forged-True of Los Angeles will be used.

The 1968 Javelin "homologation" specification papers have been submitted to the ACCUS/FIA office, and they have been approved. A copy of these homologation forms will be sent free of charge upon written request to Carl Chakmakian.

Details of the Javelin Racing Team are explained in the enclosed press release.

Cont.

2. GRANT/REBEL "FUNNY CAR": American Motors is sponsoring the building and campaigning of a new Rebel "funny car" for 1968 in the expert hands of Hayden Proffitt with Grant Industries of Los Angeles. This is in follow-up to the successful performance record of the 1967 Grant/Rebel funny car after completing a 19-city-tour of races and dealer showroom displays.

The specially-constructed and modified AM-powered 1967 car has covered the 1/4 mile in 8.11 seconds, and has speed marks up to 180.85 MPH . . . extremely respectable for the very first season of competition. After competing at the AHRA National meet in Long Beach on Jan. 26-27, plus the NHRA National meet in Pomona on Feb. 3-4, the 1967 Grant/Rebel funny car will be put on show circuit starting with the Chicago Auto Show on February 24, 1968. The new race car will be covering the 1968 drag-strip circuit plus dealer showroom display across the country.

A complete press story on the 1967 Grant/Rebel race car program is in the enclosed "news" section of this book. Throughout the '67 season (and currently), there has been heavy coverage about the car with a long series of ads, PR releases, car-buff-publications articles plus local radio and TV spots in cities where the car was raced and displayed.

3. DOUG'S/JAVELIN "FUNNY CAR": American Motors is sponsoring the building and campaigning of a new Javelin "funny car" for 1968 in the equally expert hands of Doug Thorley with Doug's Headers Company of Los Angeles. This brand new Doug's/Javelin program should prove to be an exciting running mate to the Grant/Rebel program. Doug Thorley, considered one of the best in the business, has had an extremely successful season in 1967 with a Corvair funny car. The new Doug's/Javelin funny car is scheduled to be ready for racing about March 1, 1968.

4. "ROGUE RUNNER" STOCK DRAG RACER: For over a year, a 1967 Rambler American "Rogue" hardtop with 225 HP 290 CID V-8 has raced in Los Angeles area drag meets as a Motor Trend Magazine "project car" supplied by American Motors. Appropriately tagged the "Rogue Runner", the finely-tuned car has modest modifications for stock classes. The hot little American has a good collection of trophies plus a series of stories in Motor Trend . . the latest in the Feb. '68 issue. The AM-sponsored car will continue to run in the '68 season.

Cont.

5. NAVARRO/RAMBLER-6 "INDY CAR": American Motors is sponsoring the continuing program to further develop the Rambler Six-powered Navarro Engineering Special, a championship Indianapolis race car. The 199 cubic-inch six (the standard engine in the Rambler American) is equipped with a turbo-supercharger, and turned the Indy track at 153 MPH with Les Scott behind the wheel (fastest six ever at Indy). This was done with a carburetor, but there will be greater speed potential with a new fuel-injection system being developed by Barney Navarro. For the technically-minded, Navarro used stock block, heads, rocker arms, seven-main-bearing crankshaft, plus a reground stock cam!
6. JAVELIN CAR CLUB: A program was recently established to form a nationwide network of Javelin Car Clubs having direct affiliation with the National Hot Rod Association (NHRA). Details of this car club program, which has administration sponsorship by American Motors, are explained in the enclosed section of this book.
7. HI-PERFORMANCE "AM" PARTS: American Motors will continue to develop its already established program of offering hi-performance parts in "Group-19" of its parts catalog, for sale by AM Dealers. For complete details on availability and part numbers, please refer to the enclosed section of this book.
8. HI-PERFORMANCE "OUTSIDE" PARTS: American Motors will continue to encourage speed equipment manufacturers to produce and market hi-performance equipment suited for AM products. For a complete explanation on this program, plus a list of company names, please refer to the enclosed section of this book.
9. PARTS DISCOUNT PROGRAM: See enclosed section of this book.
10. CONTINGENCY CASH AWARD PROGRAM: See enclosed section of this book.

11. TECHNICAL INFORMATION: Information and questions concerning the technical aspects of hi-performance and racing will be handled upon request to those interested. Informative literature now available includes the following items:

- a. 1968 AMA Specification form covering all models and engines, including the new 390 CID V-8 and the AMX 2-passenger sports car (copy enclosed).
- b. ACCUS/FIA "homologation" forms for Javelin participation in Trans-Am and SCCA sedan racing (supplied upon request).
- c. NHRA Specification forms covering basic engine dimensions for stock class drag racing (supplied upon request).
- d. AM "Group-19" Hi-Performance Parts Catalog Pages (copy enclosed).
- e. List of speed equipment manufacturers now making parts for AM products (copy enclosed).
- f. A list of the addresses for the various sanctioning organizations plus race schedules (copy enclosed). Please contact them directly concerning specific questions regarding rules, classes, race dates, etc.
- g. 1968 AM Retail Price List covering all models, engines and factory options, including the new 390 CID-V-8 and the AMX 2-passenger sports car (supplied upon request).
- h. 1968 AM Sales Catalog available at AM Dealers (supplied upon request).

Performance Bulletin AM-68-3
Z-68-3

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: JAVELIN CAR CLUBS

The attached news release from NHRA further explains the Javelin Car Club program that was first called to your attention by our news release and letter of explanation dated October 27, 1967 from this office.

The program has been launched with good results, as evidenced by a great many Dealers who have already taken action to participate in this excellent youth promotion program.

More news to follow from Mr. Ron Root of NHRA and from this office.

A MEMBER OF ACCU-FIA

NATIONAL HOT ROD ASSOCIATION • 3418 WEST FIRST STREET, LOS ANGELES, CALIFORNIA 90004 • (213) 386-2520

TO: AMERICAN MOTORS/RAMBLER DEALERS

FROM: NATIONAL HOT ROD ASSOCIATION, Car Club Division

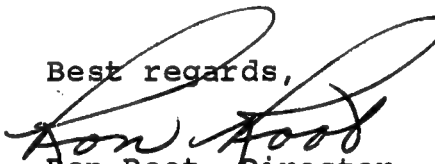

SUBJECT: AMERICAN MOTORS JAVELIN CAR CLUBS

The recent announcement of the new JAVELIN Car Club program has set off a wave of inquiries from American Motors Dealers throughout the United States. Formation material and car club information is being sent to dealers upon request, and exciting new JAVELIN Club identification is being prepared by American Motors and National Hot Rod Association.

Now that the all new AM Javelin is on the showroom floors, dealers are urged to take steps to organize their JAVELIN Clubs as quickly as possible. With the prospect of becoming a JAVELIN Club member, increased activity by the youth will result at participating dealerships. In order to be as uniform and successful as possible, all JAVELIN Clubs must adhere closely to the basic guidelines. NHRA is attaching a format of these guidelines, designed to assist sponsoring dealers with the formation of their clubs. Allowance has been provided for the adaptation of the program to the needs and desires of both club and dealership.

It is strongly recommended that each interested dealership appoint a representative from the organization to assist with the initial formation of the Javelin Club. Additional information with regard to organization, sponsorship, advisors and activities will be forwarded to you upon request by Ron Root, Director, Car Club Division, National Hot Rod Association, 3418 West First Street, Los Angeles, California 90004.

Best regards,

Ron Root, Director
Car Club Division

Enclosures

JAVELIN CAR CLUBS

PURPOSE OF THE CLUB

The purpose of the JAVELIN Club is product orientation rather than, as with some other manufacturers' clubs, product ownership. Product appreciation, therefore, will depend greatly on the dealership-club rapport. The group selected will be seeking recognition, supervision, advisorship and a "home" for their meetings.

SELECTING A GROUP

Interest in joining a Javelin Club may be developed by word-of-mouth, through regular advertising media or through the sales and service staff. It is necessary to select members who will compliment the dealership. A check with school, church and local enforcement agency will aid in ensuring an acceptable club.

MEMBERSHIP REQUIREMENT

Membership should be limited to between ten (10) and twenty (20) members. With a club of this size, all members have an opportunity to participate in club activities and space is less of a problem for meetings. The dealership is requested to assume the NHRA Charter fee of \$10 as well as the first ten (10) memberships at \$8 each. A minimum of six (6) members are required to Charter a JAVELIN Club with NHRA.

SUPERVISION AND ADVISORS

To strengthen the dealer-club relationship, it is advantageous to use advisors from the dealership. A member of the mechanical staff may act as automotive advisor, while a member of the sales or service department may be selected as club advisor. The club advisor will act as a liaison between the club, dealership and community. If there is no one within the dealership that is interested, an outside person may be found through the club. Often a father of one of the members will fill this role.

MEETING ROOM

Facilities for club meetings should be provided at the dealership. A separate room for this purpose is not necessary. In fact, a room could be used for meetings and yet be available to the public. Trophies and awards could be exhibited to customers thus orientating them to the program. The renovation and decorating of such a room makes an enjoyable club activity.

AUTOMOTIVE AND PRODUCT INSTRUCTION

Regular clinics by the mechanical advisor or other knowledgeable persons may be conducted at designated club meetings. Properly presented, these clinics serve two purposes - product orientation and constructive instruction to the members. Such subjects as preventative maintenance, ignition, carburetion, running gear, etc., are topics for consideration.

OPTIONAL PRODUCT INVOLVEMENT

A proven program for product involvement is a dealer furnished, current model automobile for club use under the supervision of the advisors. Such an automobile may be the recipient of maintenance, repair and club pride. Additionally, a club car may be taken to the local drag strip, where, again under the supervision of the advisor, the fruits of the club's efforts are tested. By maintaining the car in a relatively stock condition, the expense to the dealer can be kept minimal. An automobile directly involves club members in the product and serves as a media for publicity in the local community. With dealership and club identification conservatively imprinted on the vehicle, ventures such as parades, charity drives, civic projects, reliability runs and a multitude of other activities are ideal for exposure.

PUBLICITY AND RECOGNITION

In order to be of benefit, a program such as the Javelin Clubs requires publicity and recognition. The National Hot Rod Association and American Motors are prepared to furnish news releases and articles to the NHRA weekly publication National DRAGSTER, as well as other major automotive publications. Activity reports, pictures, and other newsworthy items are systematically used in many magazines and newspapers of the industry. Such publicity stimulates an interest in the product as well as the clubs.

The JAVELIN car club program offers an entirely fresh approach to the youth market, and can build prestige in the community. The National Hot Rod Association and American Motors feel that these clubs may be developed into an integral part of a civic service structure by participating and assisting in community activities. A wholesome relationship, such as this, between the dealership and a youth group, if properly supervised, will be a furtherance to both club and dealer objectives.

October 27, 1967

Performance Bulletin AM-68-1
Z-68-1

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: JAVELIN CAR CLUB

The attached press release briefly explains a new national program for the formation of Javelin Car Clubs on a joint basis with American Motors and the National Hot Rod Association (NHRA).

The network of dealer-oriented Javelin Car Clubs will have direct affiliation with the present NHRA Charter Club Program, with administration sponsorship by American Motors. This club program will be sponsored on a voluntary basis by AM dealers interested in forming such local clubs.

We feel confident that this club program can play an important role to help gain attention of the performance-minded youth market by stimulating direct contact in a variety of car activities centered at your dealership. We are looking for much more than just a card-carrying, newsletter club organization. Instead, we are aiming for "working, doing and direct involvement" clubs and as many such dealer-oriented clubs as possible.

For the last six months, a "pilot" NHRA car club has been operating with Dick Allen Rambler of Inglewood, California. Dick Allen, President, explains that the club program is of great value in establishing contact with automobile-minded youngsters who meet regularly at his dealership and work together on car performance and highway safety projects. They are also doing an outstanding job in performing a variety of civic and local goodwill promotions.

A second pilot club has just been formed by Ben Carco, President of Bonanza Rambler in North Hollywood. Even at this early date, other dealers have shown definite interest, as expressed by Bob Stephenson, Zone Manager, and Ben Kendall, Sales Promotion Manager of the Los Angeles Zone.

American Motors' sponsorship covers planning, execution, supervision and consultation with AM Dealers by local NHRA officials acting as club advisors, with supervision by Ron Root, NHRA Car Club and Highway Safety Director. Regular mailings to members and club news coverage will be made in NHRA's weekly publication, "National Dragster".

October 27, 1967

Page 2

The formation of clubs is on a purely voluntary basis, and dealer sponsorship would be as follows: For each Javelin Car Club of about 10 interested youngsters, the dealer pays the regular NHRA annual membership fee of \$8 for each member, plus a club charter fee of \$10, resulting in a total annual dealer cost of \$90 to form a club. The number of members in each club is at the discretion of the sponsoring dealer, and ownership of a Javelin or any other American Motors' car is definitely not necessary for membership status, except that an American Motors' car owner would have priority.

The Javelin Car Club program will be launched on a nation-wide basis by the first of 1968. You will soon receive more information from NHRA. In the meantime, interested American Motors' dealers are invited to drop a line to Ron Root, Car Club and Highway Safety Director, NHRA, 3418 West First Street, Los Angeles, California, 90004.

Very truly yours,

FOR IMMEDIATE RELEASE

DETROIT, Oct. 27--A program to establish a nationwide network of Javelin Car Clubs has been announced jointly by American Motors Corporation and the National Hot Rod Association (NHRA).

Local car clubs, sponsored on a voluntary basis by American Motors-Rambler dealers, will have direct affiliation with the NHRA Charter Club Program, with administration sponsored by AM.

"Membership will be open to all car enthusiasts and will not be restricted to those who own a Javelin or other American Motors cars," said Carl Chakmakian, manager of the performance activities for AM.

In the joint announcement, NHRA President Wally Parks said membership in a Javelin Car Club will automatically include membership in NHRA.

Success of the "pilot" club formed by Dick Allen Rambler of Inglewood, California resulted in the launching of the national program, said Chakmakian.

Local NHRA officials will act as club advisors under the supervision of Ron Root, car club and highway safety director for NHRA.

Facilities for meetings will be provided by the sponsoring dealer. Club members will receive special informational mailings, and club news coverage will be made in NHRA's weekly publication, "National Dragster".

Javelin Car Club emblems will be provided to members.

AMERICAN MOTORS SALES CORPORATION

14250 PLYMOUTH ROAD • DETROIT, MICHIGAN 48232

February 1, 1968

Performance Bulletin AM-68-5
Z-68-5

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: AM CONTINGENCY CASH AWARD PROGRAM
for DEALERS and PRIVATE OWNERS

American Motors is engaged in sponsoring and conducting several race car programs on a national scale plus other related programs, all at no expense to AM Dealers. American Motors recognizes the fact that AM Dealers and private owners also wish to compete in various racing activities of their own on a local basis. Recognizing this, American Motors has chosen to establish a 1968 policy to pay for results, rather than pay for sponsorship.

The Contingency Cash Award Program for 1968 is an incentive program that acknowledges competition results of race cars sponsored by Dealers, Dealer Associations and private owners. The cash awards for competition race results will apply to any year and any model of an American Motors automobile with an AM-powerplant, and also for AM-powered special race cars, entered in officially-sanctioned racing events as follows:

1. NHRA World/National/Division "Championship Series" Drag Meets.
2. AHRA World/National/Division "Championship Series" Drag Meets.
3. SCCA Trans-American Sedan Races
4. SCCA U.S. Road Racing Championship Races
5. SCCA National Championship Races
6. NASCAR Grand Touring Races
7. NASCAR Grand National Stock Car Races
8. USAC Stock Car Division Races

Tentatively Planned
Subject to Change
Details to Follow

I'm sure you would agree it would be unwise and unfair of us to offer "behind-the-scenes" sponsorship to only a few selected dealers or individuals, and not offer the same privileges to all others. In other words, we simply could not operate an open policy of sponsorship for all requests since our resources are limited within the performance activities department.

Carl Chakmakian, Manager
Performance Activities

AM CONTINGENCY CASH AWARD PROGRAM

for Dealers and Private Owners

Competing in 1968

NHRA CHAMPIONSHIP DRAG RACES

American Motors' Contingency Cash Award Program for 1968 acknowledges winners and first runner-ups in NHRA Championship series drag meets in all seven eliminator categories for race cars sponsored by Dealers, Dealer Associations and private owners. Cash awards are for any year and any model of an American Motors automobile with an AM-powerplant, and also for AM-powered special race cars, entered in any of the seven NHRA eliminator categories as follows:

<u>ELIMINATOR CATEGORY</u>	<u>42 World Championship Series Points Meets (6 Meets in 7 Divisions)</u>		<u>"Big-4" Meets (World/National Championship Meets)</u>	
	<u>WINNER</u>	<u>RUNNER-UP</u>	<u>WINNER</u>	<u>RUNNER-UP</u>

FOR IMMEDIATE RELEASE

DETROIT, Jan. 26 -- American Motors Corporation announced today it will post first place and runner-up contingency awards in all seven eliminator categories of National Hot Rod Association championship drag races, and in all 11 eliminator categories of American Hot Rod Association championship drag races.

Carl Chakmakian, manager of performance activities for American Motors, said contingency awards ranging from \$75 to \$400 will be made to all eliminator category winners and runners-up driving any year and any model of an American Motors automobile with an AM powerplant, and also for AM-powered special race cars.

"The Contingency Cash Award Program for 1968 is an incentive program that acknowledges competition results of race cars sponsored by American Motors dealers, dealer associations and private owners," Chakmakian said.

The contingency award program for all seven NHRA eliminator categories will provide \$200 for winners and \$100 for runners-up in American Motors automobiles with an AM-powerplant, and AM-powered special race cars, in the 42 World Championship Series Points Meets, and \$400 for winners and \$200 for runners-up in the "Big-4" Meets.

-more-

NHRA eliminator categories include Stock, Super Stock, Street, Competition, Super, Top Gas and Top Fuel.

For the 40 Division Points Meets in AHRA competition, contingency awards of \$150 for winners and \$75 for runners-up in all 11 AHRA eliminator categories will be in effect for American Motors automobiles with an AM-powerplant, and AM-powered special race cars. The awards will be \$300 for winners and \$150 for runners-up in the six AHRA Major Meets.

AHRA eliminator categories include Little Stock, Middle Stock, Top Stock, Super Stock, Street, Competition, Jr. Fuel, Top Gas, Top Fuel, FX Gas and FX Fuel.

"American Motors recognizes that a number of its dealers, and many private owners, desire to compete in various racing activities," Chakmakian said. "This program is designed to reward them for competitive results."

February 1, 1968

Performance Bulletin AM-68-6
Z-68-6

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: PARTS DISCOUNT PROGRAM FOR DEALERS

A special Parts Discount Program is in effect for 1968 to Dealers who directly sponsor or co-sponsor competition race cars. A 20% discount based on dealer net cost is extended to all AM Dealers in the United States on all AM parts (regular parts and "Group-19" hi-performance parts) used for competition race cars.

To qualify for the 20% parts discount program, and to assure that the ordered parts will be used for competition race cars only, the following steps must be taken:

1. The Dealer may use any present order form and print in a bold, prominent manner ... "RACE CAR PARTS".
2. The Dealer or Dealer's Parts and Service Manager must sign the order form.
3. Written order form must be submitted by the Dealer via normal channels to the Zone Office. Phoned-in orders are acceptable in case time is a problem.
4. Orders must have an approval signature from the Zone Parts and Service Manager or District Manager.
5. Upon receipt of such Dealer orders, the Zone translates the order on a standard F9800 order form, and then marks the top of the order form "RACE CAR PARTS", indicating the 20% discount in the appropriate place below. The 20% discount does not apply to shipping/insurance charges.
6. The present 5%, 7-1/2% and 10% discounts continue to be in effect, but these discounts naturally do not apply if the 20% discount for race car parts is applied.
7. To measure the popularity and effectiveness of this program, a carbon or machine copy of the order form must be mailed by the Zone to this office.

February 1, 1968

Performance Bulletin AM-68-10
Z-68-10

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: Warranty Effects of High-Performance Modifications

The following information appears in the "Dealer Management Manual - Warranty Administration":

III - 14 HIGH PERFORMANCE MODIFICATIONS

Parts supplied by American Motors for high-performance modifications are covered by the American Motors Service Parts and Accessories Warranty (except batteries). (Refer to II - 2A.)

Installation of high-performance kits, or any other modification to achieve high-performance characteristics, voids any and all warranty coverage for the car component so modified, as well as for all remaining components of the entire power plant (complete engine and related ignition, cooling, fuel, exhaust and control systems complete transmission (including transmission control system and, on manual transmissions, clutch assembly and controls), drive shaft, universal joints, complete rear axle, complete steering system, wheels, complete brake system and complete front and rear suspensions. This voiding of the original New Car Warranty on such components is effective from the date of the first modification and is based on test procedures which demonstrate that, even when driven conservatively, such a car is not "under normal use and service."

The paragraphs above are simply repeated from II - 1G. It should be noted that, after any such modification, even the existence of an obvious defect in one of the specified components does not make the repair eligible for warranty coverage. (Refer to III - 21, "Special Adjustments.")

Very truly yours,

Carl Chakmakian, Manager

Performance Bulletin AM-68-7
Z-68-7

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: HI-PERFORMANCE EQUIPMENT FROM AM PARTS DEPT.

Starting in February of 1967, American Motors offered three hi-performance items listed in "Group-19" of the American Motors Parts Catalog.

Starting with a camshaft kit, a 4.44:1 rear axle ratio kit, and a heat-blocker intake manifold gasket, the list of items has grown as evidenced by referring to the attached Group-19 pages reprinted from the 1968 American Motors Parts Catalog.

As new hi-performance items become available, revised pages for Group-19 will be issued to American Motors Dealers (who subscribe to the revised page mailing service). If required, special early notice will be sent to dealers in advance of revised parts catalog pages.

AM parts (regular or hi-performance) are available for purchase only from an AM Dealer, who in turn can order parts via the normal Zone channels.

Prices for Group-19 parts are listed in the AM Parts List Price Catalog on file at all AM Dealers.

Very truly yours,

Carl Chakmakian, Manager
Performance Activities

Performance Bulletin AM-68-8
Z-68-8

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: HI-PERFORMANCE EQUIPMENT FOR AMERICAN MOTORS PRODUCTS
FROM SPEED EQUIPMENT MANUFACTURERS (OUTSIDE SOURCES)

American Motors policy is to encourage speed equipment manufacturers to produce and offer hi-performance equipment suited for AM products to the performance-minded public.

A good number of speed equipment manufacturers have already chosen to offer parts for American Motors products. Because of the fast growing number of such outside manufacturers entering the picture, American Motors is not in the position to be able to test the individual items offered by these outside concerns to the public. However, the performance-minded fraternity of individual race car owners usually have their own preference based on past experience and reputation for results.

The attached list is for your follow-up reference to the speed equipment manufacturers who are either now offering hi-performance parts for American Motors products, or will soon be doing so. Because of rapidly changing conditions, the list may not be complete, but does represent those now engaged to the best of our knowledge.

Very truly yours,

Carl Chakmakian, Manager

FOR IMMEDIATE RELEASE

DETROIT, September 26 -- The appointment of Carl Chakmakian to the newly-created post of manager of performance activities for American Motors Corporation has been announced by R. W. McNealy, vice-president-automotive marketing services.

Chakmakian, formerly manager of product information, will coordinate activities and programs related to the preparation of American Motors cars for competition by owners and dealers, McNealy said.

McNealy said that while the company does not plan to engage in a large scale racing program, it will be increasingly active in selected areas of competition "where our resources and abilities will allow us to make a creditable showing."

"Basically, the program is intended to assist our dealers and customers by developing the 'hardware' required for competition on the drag strips and in sedan racing," he said.

"The increasing interest in American Motors cars for drag strip competition, Trans-American and sports car club sedan racing, and the growing number of young owners who want to participate in these events dictates a more active role at the factory level to support this interest," he said.

-more-

The company is taking the necessary steps to qualify its sporty Javelin for competition in the 1968 Trans-American championship races and Sports Car Club of America races. It is currently conducting a joint program with Grant Industries of Los Angeles in campaigning an experimental drag racing car on the national circuit. The Grant/Rebel SST, a special tube-frame, fiberglass car powered by a supercharged fuel injection AM V-8, has exceeded 170 mph in 1/4-mile match races with 8.5 seconds elapsed time.

The introduction of the company's new AMX sports car and 390 V-8 engine in early 1968 are expected to create added interest in the performance capabilities of American Motors cars and in their use for competitive racing by dealers and owners, McNealy said.

Chakmakian, who holds an engineering degree from the University of Michigan, joined American Motors in 1953 as an assistant technical advisor, and has served as product information manager since 1961. He is a commander in the Naval Air Reserve, and a member of the Society of Automotive Engineers, Sports Car Club of America, Reserve Officers Association, and U. of M. Alumni Club of Dearborn.

FOR IMMEDIATE RELEASE

DETROIT, Oct. 27--A program to establish a nationwide network of Javelin Car Clubs has been announced jointly by American Motors Corporation and the National Hot Rod Association (NHRA).

Local car clubs, sponsored on a voluntary basis by American Motors-Rambler dealers, will have direct affiliation with the NHRA Charter Club Program, with administration sponsored by AM.

"Membership will be open to all car enthusiasts and will not be restricted to those who own a Javelin or other American Motors cars," said Carl Chakmakian, manager of the performance activities for AM.

In the joint announcement, NHRA President Wally Parks said membership in a Javelin Car Club will automatically include membership in NHRA.

Success of the "pilot" club formed by Dick Allen Rambler of Inglewood, California resulted in the launching of the national program, said Chakmakian.

Local NHRA officials will act as club advisors under the supervision of Ron Root, car club and highway safety director for NHRA.

Facilities for meetings will be provided by the sponsoring dealer. Club members will receive special informational mailings, and club news coverage will be made in NHRA's weekly publication, "National Dragster".

Javelin Car Club emblems will be provided to members.

FOR IMMEDIATE RELEASE

DETROIT, Dec. 7 -- American Motors today announced that Javelin Racing Team, Inc., of Milwaukee, will campaign the company's sporty Javelin in the 1968 Trans-American championship road races.

Carl Chakmakian, manager of performance activities for American Motors said "this will provide an organized factory-team approach to preparing and campaigning Javelins on the Trans-Am circuit.

"The performance characteristics built into the Javelin give it the potential to make it an outstanding contender."

Javelin Racing Team, Inc., is headed by James Jeffords, who also will serve as manager of the Javelin team. Jeffords is an experienced sports car driver in his own right, having won the Sports Car Club of America championship two successive years -- 1958 and 1959. He retired from competition six years ago, but has maintained an active interest in the sport.

Chakmakian said that preparation and maintenance of the competition Javelins will be handled by Ronnie Kaplan Engineering, Inc., of Chicago, known for its experience in preparing virtually all types of competition cars.

Traco Engineering, Inc., of Los Angeles, has been retained to work on engine development, and has a long record of successful race engines.

"This arrangement will bring to bear a wide range of knowledge and experience to demonstrate the Javelin's competitive capacity," Chakmakian said.

"The Javelin Racing Team is aiming to compete in the series of 12 Trans-Am races starting with the 12-hour race at Sebring, Florida on March 23" he said.

AMERICAN MOTORS SALES CORPORATION

Performance Bulletin AM-68-2
Z-68-2

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: "NATIONAL DRAGSTER" and AM PERFORMANCE ACTIVITIES

Enclosed is the January 5th issue of "National Dragster". We felt you would want a copy since it is devoted to news about some of our performance activities, as follows:

Page 3 ...NHRA drag racing classification chart for all 1968 AM cars and engines. This information will prove to be a handy reference to answer questions from the drag strip enthusiast, and is based on our new 1968 AMA Specifications (including 390 V-8 and AMX).

Page 3 & 5 ... News about "Javelin Car Club". All AM Dealers received our press release and letter of explanation dated October 27, 1967 from this office. Since then, a good number of Dealers have signed up for this excellent youth promotion program.

Page 3 ... News about AM Dealers drag racing in Southern California. This represents only one of a great many similar programs sponsored by dealers and associations around the country.

Page 3 ... News about the 1967 Grant/Rebel "funny car" which recently completed a 19-city tour of drag racing plus showroom display at AM Dealers. This AM-sponsored program will be continued with a new 1968 Grant/Rebel racer now under construction.

Page 1 ... In the "Dyno" article, you will find news about the performance of the Grant/Rebel "funny car" in the expert hands of Hayden Proffitt.

Page 6 ... Ad sponsored by Doug's Headers covering exhaust headers for our products. Doug Thorley, a sensational "funny car" man, has started construction on a Javelin for the hot drag strips in '68. So for '68, we will have two highly competitive funny cars sponsored by AM ... the Grant/Rebel with Hayden Proffitt and the Doug's/Javelin with Doug Thorley ... a real first-class racing pair.

Page 2

Page 8... Ad covering accomplishments of the 1967 Grant/Rebel "funny car" sponsored by American Motors.

Page 13.. Ad sponsored by four outside speed equipment manufacturers announcing special parts for AM V-8 engines and the Javelin. A great many other speed equipment manufacturers also have parts available, and you will soon receive a listing of all manufacturers from this office.

You received a press release dated December 6, 1967 announcing our entry into "Trans-Am" sedan racing with a factory-team of two Javelins that will compete on road-racing courses starting March 23 at Sebring, Florida. These Javelin Racing Team cars are in the final prep stage by Ronnie Kaplan Engineering of Chicago, with race-engine development work by Traco Engineering of Los Angeles.

We are working on more performance activities to help promote the sale of our exciting performance-oriented products. You will hear about them real soon.

Performance Bulletin AM-68-4
Z-68-4

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS

SUBJECT: GRANT/REBEL and DOUG'S/JAVELIN "FUNNY CAR" DRAG RACER

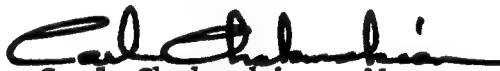

GRANT/REBEL; This is to announce that American Motors will sponsor the building and campaigning of a new Grant/Rebel "funny car" drag racer for the 1968 season in the expert hands of Hayden Proffitt with Grant Industries. This follows the successful performance record of the 1967 Grant/Rebel car after completing a 19-city drag-racing tour across the country.

The specially constructed Rebel racer with a modified AM-powerplant (supercharged and fuel injected) has covered the 1/4 mile in 8.11 seconds with speed marks up to 180.85 MPH, and set seven track records in the process ... extremely competitive for the very first season of racing. The 1967 Grant/Rebel will be on an auto show tour for 1968, while the new race car is on the drag-strip circuit.

We felt you would want a copy of the attached news release and photograph from Grant Industries since it is an interesting wrap-up story on the accomplishments of the 1967 Grant/Rebel.

DOUG'S/JAVELIN; American Motors also announces that it will sponsor the building and campaigning of a new Javelin "funny car" for the 1968 season in the equally expert hands of Doug Thorley with Doug's Headers of Los Angeles. This brand new Doug's/Javelin should prove to be an exciting running mate to the Grant/Rebel. Doug Thorley, considered one of the best in the business, has had a most successful season in the 1967 funny car racing circuit.

You will be hearing more about these two performance activities to help generate more car sales for you.

Grant NEWS

FROM THE PUBLIC RELATIONS OFFICES OF

GRANT INDUSTRIES INC.
3680 BEVERLY BOULEVARD
LOS ANGELES, CALIF. 90004
AREA CODE 213 • 382-8386

FOR IMMEDIATE RELEASE:

GRANT REBEL SST FINISHES FIRST SEASON WITH SEVEN RECORDS!

In June, 1967, the Grant Rebel SST drag match racer took to the nation's race tracks -- and murmurs of doubt quickly changed to cheers! By the end of the year the car had set a national speed record and six track records!

The Grant Rebel was engineered and built for American Motors Corporation by Grant Industries in Los Angeles.

The idea was to prove that American Motors' cars could compete with "The Big Three" makes on race tracks. The Grant Rebel not only competed, it decisively defeated racers of each make.

The Grant Rebel's first impressive accomplishment came when it ran 172 m.p.h. to make the top ten qualifiers at the National Hot Rod Association's Summer Nationals in Indianapolis.

Then it set a new national speed record for one-eighth mile tracks with a blistering 136 m.p.h. at St. Louis International Raceway. (This run was backed by a 156 m.p.h. score.) The Rebel's performance here also set a new speed record for the track.

The Rebel next set a new track speed record at Vargo Dragway in Allentown, Pa. Its tour of Florida resulted in new track speed and elapsed time records at Tampa Dragway and at Central Florida Raceway in Orlando.

(more)

The Grant Rebel's most spectacular run came in Tampa when it defeated The Penetration, a Dodge Charger, with a speed of 180.85 m.p.h. and an elapsed time of 8.11 seconds.

Race fans were especially impressed that popular Hayden Proffitt, four-time-national-drag-racing champion, parked a Chevrolet racer to drive the Grant Rebel to these victories.

Fuel-injected and supercharged, the Grant Rebel SST develops 1,200 horsepower at 9,000 revolutions per minute. Its American Motors' engine was specially prepared and modified for racing by Grant. Its tires are Goodyear and its spark plugs are Champion, the same brands all American Motors' cars are delivered with.

The Grant Rebel has a special tubular steel frame with a fiberglass shell body and runs in the sophisticated X/S (Experimental Stock) class, known in racing circles as the "funny car" class.

Grant MacCoon, president of Grant Industries said, "The Grant Rebel SST was one race car that had to run. The record proves that it did. And we are proud, although we were confident from the beginning that it would. American Motors' cars are great automobiles. We knew it and we're sure the whole world knows it now. We've even received fan mail from behind the Iron Curtain."

Grant Industries manufactures the famous Grant piston rings and automotive specialty equipment such as the Flamethrower ignition systems and custom steering wheels. Long famous in racing, Grant ran the Grant Piston Ring Specials at Indianapolis in the late 40's and early 50's.

In 1967 the Grant Rebel raced in 19 cities. It was exhibited

(more)

in American Motors/Rambler showrooms for two or three days before each race date. The car attracted an average of 850 visitors to each showroom displaying it and dealers unanimously agreed that the 1967 campaign was a complete success.

Grant Industries is currently preparing a new Rebel to race in the 1968 season. Like the 1967 Rebel, it will be toured nationally for American Motors.

FOR IMMEDIATE RELEASE

DETROIT, Jan. 26 -- American Motors Corporation announced today it will post first place and runner-up contingency awards in all seven eliminator categories of National Hot Rod Association championship drag races, and in all 11 eliminator categories of American Hot Rod Association championship drag races.

Carl Chakmakian, manager of performance activities for American Motors, said contingency awards ranging from \$75 to \$400 will be made to all eliminator category winners and runners-up driving any year and any model of an American Motors automobile with an AM powerplant, and also for AM-powered special race cars.

"The Contingency Cash Award Program for 1968 is an incentive program that acknowledges competition results of race cars sponsored by American Motors dealers, dealer associations and private owners," Chakmakian said.

The contingency award program for all seven NHRA eliminator categories will provide \$200 for winners and \$100 for runners-up in American Motors automobiles with an AM-powerplant, and AM-powered special race cars, in the 42 World Championship Series Points Meets, and \$400 for winners and \$200 for runners-up in the "Big-4" Meets.

-more-

NHRA eliminator categories include Stock, Super Stock, Street, Competition, Super, Top Gas and Top Fuel.

For the 40 Division Points Meets in AHRA competition, contingency awards of \$150 for winners and \$75 for runners-up in all 11 AHRA eliminator categories will be in effect for American Motors automobiles with an AM-powerplant, and AM-powered special race cars. The awards will be \$300 for winners and \$150 for runners-up in the six AHRA Major Meets.

AHRA eliminator categories include Little Stock, Middle Stock, Top Stock, Super Stock, Street, Competition, Jr. Fuel, Top Gas, Top Fuel, FX Gas and FX Fuel.

"American Motors recognizes that a number of its dealers, and many private owners, desire to compete in various racing activities," Chakmakian said. "This program is designed to reward them for competitive results."

Performance Bulletin AM-68-9

Z-68-9

TO: ALL AMERICAN MOTORS/RAMBLER DEALERS
FROM: Carl Chakmakian, Manager, Performance Activities
SUBJECT: RACE CAR COLOR SCHEME

The unique color scheme used for our Javelin "Trans-Am" race cars is shown below freshly painted and ready for race numbers. When you see the cars in person or see color pictures, we think you will agree that the color scheme really looks like a winner!

We would like others to consider using this same color scheme for their AM race cars. While the color scheme is shown on the Javelin, it works equally as well on the AMX, Rebel, Ambassador or Rambler American.

The red/white/blue colors used on our Javelin Trans-Am race cars are straight lacquer (not acrylic or enamel) and are readily available everywhere. The colors are:

RED ... Rinshed-Mason, RM #1440R ("Rangoon Red").

WHITE ... Sherwin-Williams, SW #26W30576 ("Refrigerator or Porcelain White").

BLUE ... Rinshed-Mason, RM #55J24 ("Persian Blue").

Similar red, white and blue colors can be used, as can acrylic lacquer or enamel if availability presents a problem ... the choice is really up to the dealer or car owner. The red and blue colors can be reversed to suit personal preference as follows:

	<u>FRONT</u>	<u>REAR</u>	<u>MID-SECTION</u>
Scheme #1	Red	Blue	White (1/4" to 3/8" <u>blue</u> accent stripe front, <u>red</u> stripe rear)
Scheme #2	Blue	Red	White (1/4" to 3/8" <u>red</u> accent stripe, front, <u>blue</u> stripe rear)

AMC '68 STOCK CLASSES

NHRA's two Eliminator categories for stock car competition in 1968 are defined as Super Stock (high-performance models) and Stock. There are twelve classes for Super Stocks, six of which are for cars with manual transmissions and six for automatics. The Stock category classes total thirty-four, fourteen of them for cars with automatics.

Classes are divided according to an official NHRA classification factor for the sake of competition equality. The following classifications are made as per NHRA Performance Ratings as listed in the NHRA Official Stock Car Classification Guide.

Complete details regarding class allowances and requirements can be found in the official 1968 NHRA Rule Book.

SUPER STOCK CLASSES

SS/A and SS/AA — 0.00 to 5.99
 SS/B and SS/BA — 6.00 to 6.99
 SS/C and SS/CA — 7.00 to 7.69
 SS/D and SS/DA — 7.70 to 8.69
 SS/E to SS/EA — 8.70 to 9.49
 SS/F and SS/FA — 9.50 or more

STOCK CLASSES

A/S and A/SA — 8.00 to 8.49
 B/S and B/SA — 8.50 to 8.99
 C/S and C/SA — 9.00 to 9.49
 D/S and D/SA — 9.50 to 9.99
 E/S and E/SA — 10.00 to 10.49
 F/S and F/SA — 10.50 to 10.99

G/S and G/SA — 11.00 to 11.49
 H/S and H/SA — 11.50 to 11.99
 I/S and I/SA — 12.00 to 12.49
 J/S and J/SA — 12.50 to 12.99
 K/S and K/SA — 13.00 to 13.49
 L/S and L/SA — 14.00 to 14.99
 M/S and M/SA — 15.00 to 15.99
 N/S and N/SA — 16.00 to 16.99
 O/S — 17.00 to 18.99
 P/S — 19.00 to 20.99
 Q/S — 21.00 to 22.99
 R/S — 23.00 to 24.99
 T/S — 25.00 to 26.99
 U/S — 27.00 or more

67 STOCK CLASSES

NHRA's two Eliminator categories for stock car competition in 1967 are defined as Super Stock (high-performance models) and Stock. There are ten classes for Super Stocks, five of which are for cars with manual transmissions and five for automatics. The Stock category classes total twenty-three, nine of them for cars with automatics.

Classes are divided according to an official NHRA classification factor, usually based on the ratio of a car's advertised horsepower to its shipping weight. In some cases NHRA assigns an arbitrary classification factor for the sake of competition equality, which may not coincide exactly with the manufacturer's horsepower or weight specifications.

Complete details regarding class allowances and requirements can be found in the official 1967 NHRA Drag Rules.

SUPER STOCK CLASSES

Class SS/A and SS/AA — 0.00 to 6.99
Class SS/B and SS/BA — 7.00 to 7.69
Class SS/C and SS/CA — 7.70 to 8.69
Class SS/D and SS/DA — 8.70 to 9.49

ENGINE – CRANKCASE VENTILATION SYSTEM

Type (ventilates to atmos., induction system, other)	Standard	Closed Induction System
	Optional	None
Make and model	Chicago Screw Co. & Novo Ind. Corp.	
Location	In-Line Between Intake Manifold & Crankcase	
Control Unit	Energy source (manifold vacuum, carburetor air stream, other)	Manifold Vacuum
	Control method (variable orifice, fixed orifice, other)	Variable Orifice
Complete system	Discharges (to intake manifold, carb. air intake, air cleaner intake, other)	Intake Manifold (Carb. Base or Carb. Spacer Plate)
	Air inlet (breather cap, carburetor air cleaner, other)	Carburetor Air Cleaner
	Flame arrestor (screen, check valve, other)	Check Valve function designed into PCV Valve.

(1) 1.75 x .042 Tailpipe for Rebel-6 Wagon

(2) Dual Exhausts Opt. With 343 V-8. { Exh. Front.....2.00 x .083
Dual Exhausts Std. With 390 V-8. { Exh. Rear.....2.00 x .059
(Dual Exhausts N.A. on Wagons) { Tailpipe.....2.00 x .059

(3) Javelin; Dual Exhausts Opt. With 290 4-B V-8 & 343 V-8.
Javelin; Dual Exhausts Std. With 390 V-8.
AMX; Dual Exhausts Std. With all V-8's.

{ Exh. Front.....2.00 x .083
{ Exh. Rear.....2.00 x .059
{ Tailpipe.....2.00 x .074

DRIVE UNITS — PROPELLER SHAFT (cont.)

Inter-mediate bearing	Type (plain, anti-friction)		None
	Lubrication (fitting, prepack)		- - -
Slip Yoke	Type		Involute
	Number of teeth		16(28 for 4-Speed Trans.&Jav/AMX with 343 V-8 Auto. Trans.)
	Spline O.D.		1.166(1.192 for 4-Speed Trans.&Jav/AMX with 343 V-8 Auto. Trans.)
Universal joints	Make and Mfg. No.		SPICER/DANA/HAYES
	Number used		Two
	Type (ball and trunnion, cross)		Single-Pivot, Cross
	Rear attach.(u-bolt, clamp, etc.)		U-Bolt
	Bearing	Type (plain, anti-friction)	Anti-Friction
		Lubric. (fitting, prepack)	Prepack
Drive taken through (torque tube or arms, springs)			Rear Springs4-Link Trailing Arms
Torque taken through (torque tube or arms, springs)			Rear Springs (1)4-Link Trailing Arms

DRIVE UNITS — AXLE

Type (front, rear)		Front		
Description		1 Piece Housing with Inserted Tubes. Live Axle (Conventional)		
Limited Slip differential, type		"Twin-Grip" Opt., Dana (Warner Gear, Amer.-6 & Javelin-6)		
Drive Pinion Offset		1-1/2		
No. of differential pinions		Two (Four with V-8 Twin-Grip)	Two (Four with Twin-Grip)	
Pinion adjustment (shim, other)		Shim		
Pinion bearing adj. (shim, other)		Shim		
Wheel bearing type		Conic & Roller		
Lubricant	Capacity (pt.)		3 for Six, 4 for V-8	4
	Type recommended		Hypoid, or Multi-Purpose Gear Lube (2)	
	SAE viscosity number	Summer	80	
		Winter	80	
		Extreme cold	80	

AXLE RATIO TOOTH COMBINATIONS

CAR AND BODY DIMENSIONS

KEY SHEET

EXTERIOR CAR AND BODY DIMENSIONS

INTERIOR CAR AND BODY DIMENSIONS

CAR AND BODY DIMENSIONS

KEY SHEET

DIMENSION DEFINITIONS

EXTERIOR WIDTH DIMENSIONS

- W101 WHEEL TREAD - FRONT. Measured at centerline of tires, with nominal camber, at ground.
 W102 WHEEL TREAD - REAR. Measured at centerline of tires at ground.
 W103 MAXIMUM OVERALL CAR WIDTH. Include bumpers, moldings, or sheet metal protrusions. Measured to outside of metal.
 W117 MAXIMUM BODY WIDTH AT #2 PILLAR. Measured across body at #2 pillar, excluding hardware and applied moldings.

EXTERIOR LENGTH DIMENSIONS

- L 30 VERTICAL ZERO LINE TO ACTUAL FRONT OF DASH. If actual Front of Dash is to the rear of Body Zero Line, it is identified by a minus (-) sign.
 L101 WHEELBASE.
 L103 OVERALL LENGTH. Include bumper guards if standard equipment.
 L104 OVERHANG - FRONT. Measured from C/L of front wheels to front of car, including bumper guards if standard equipment.
 L105 OVERHANG - REAR. Measured from C/L of rear wheels to rear of car, including bumper guards if standard equipment.
 L123 BODY UPPER STRUCTURE LENGTH AT CAR CENTERLINE. The horizontal dimension from the Cowl Point to the Deck Point.
 L127 VERTICAL ZERO LINE TO CENTERLINE OF REAR WHEELS. A horizontal dimension.
 L130 VERTICAL ZERO LINE TO WINDSHIELD COWL POINT. The horizontal dimension from the vertical zero line to the theoretical intersection of extended windshield glass plane and normal cowl surface.

EXTERIOR HEIGHT DIMENSIONS

- H101 OVERALL HEIGHT - DESIGN. Measured with the vehicle in Manufacturer's Design Weight attitude.
 H114 COWL POINT TO GROUND. Measured at vehicle centerline.
 H138 DECK POINT TO GROUND. Measured at vehicle centerline.
 H112 ROCKER PANEL TO GROUND - FRONT. The vertical dimension from ground to bottom of rocker panel, excluding flanges. Measured to the outside of sheet metal at foremost point of rocker panel.
 H111 ROCKER PANEL TO GROUND - REAR. The vertical dimension from ground to bottom of rocker panel, excluding flanges. Measured to the outside of sheet metal at front of rear wheel opening.
 H122 WINDSHIELD SLOPE ANGLE. The angle between a vertical line and the windshield surface at car centerline. On compound-curved windshields the chord of the arc is used and limited to that section of the windshield comprehended by an 18-inch chord.

GROUND CLEARANCE DIMENSIONS

- H102 BUMPER TO GROUND - FRONT. Minimum dimension, includes bumper guards.
 H104 BUMPER TO GROUND - REAR. Minimum dimension, includes bumper guards.
 H106 ANGLE OF APPROACH. The angle between ground and a line tangent to the front tire static loaded radius arc and the first point of interference, i.e., bumper, guard, gravel deflector, fender or other component, excluding license plate. This dimension may be determined graphically for reporting purposes.
 H107 ANGLE OF DEPARTURE. The angle between ground and a line tangent to the rear tire static loaded radius arc and the first point of interference, i.e., bumper, guard, gravel deflector, tail pipe, fender or other component, excluding license plate. This dimension may be determined graphically for reporting purposes.
 H147 RAMP BREAKOVER ANGLE. The supplement of included ramp angle (180° minus included ramp angle) over which car can pass without interference; measured with car sitting on a level surface, using lines tangent to arcs of front and rear static loaded radii and intersecting at point on underside of car which defines the smallest angle. This dimension may be determined by calculation (see Design Standard DD 0.00 - 108) or graphically for reporting purposes.
 H156 MINIMUM RUNNING GROUND CLEARANCE. Location of measurement on the car is to be clearly recorded.

FRONT COMPARTMENT DIMENSIONS

- H 61 EFFECTIVE HEAD ROOM - FRONT. The dimension from H Point to the headlining, plus a constant of 4.0 inches, measured along a line 8° to rear of vertical.
 L 34 MAXIMUM EFFECTIVE LEG ROOM - ACCELERATOR. Measured along a diagonal line from the Manikin ankle pivot center to the H Point plus a constant of 10.0 inches. For treadle type accelerator pedals, the leg room is measured with the Manikin's right foot on the accelerator pedal and the Manikin Heel Point at Accelerator Heel Point. All other types of accelerator pedals will be measured with the Manikin foot angle set at 87° and the shoe touching the pedal.
 H 30 H POINT TO HEEL POINT - FRONT. The vertical dimension from the H Point to the Accelerator Heel Point.
 L 17 H POINT TRAVEL. The horizontal dimension between the H Point in the most forward and rearward seat positions.

FRONT COMPARTMENT DIMENSIONS (Cont.)

- W 3 SHOULDER ROOM - FRONT. The minimum lateral dimensions between the door garnish moldings or nearest interference, measured at the H Point station.
 W 5 HIP ROOM - FRONT. The lateral dimension through the H Point to trimmed body surfaces. Depress loose side wall cloth to trim foundation or other obstruction if such construction exists.
 H 50 UPPER BODY OPENING TO GROUND - FRONT. The vertical dimension from a point on the trimmed body opening to the ground, measured at the H Point station.

REAR COMPARTMENT DIMENSIONS

- L 50 H POINT COUPLE DISTANCE. The horizontal dimension from the front seat H Point to the rear seat H Point.
 H 63 EFFECTIVE HEAD ROOM - REAR. The dimension from the H Point to the headlining, plus a constant of 4.0 inches, measured along a line 8° to rear of vertical.
 L 51 MINIMUM EFFECTIVE LEG ROOM - REAR. Measured along a diagonal line from the ankle pivot center to the H Point plus a constant of 10.0 inches, with the foot positioned to the nearest interference between the seat structure and toe, instep or lower leg.
 H 31 H POINT TO HEEL POINT - REAR. The vertical dimension from the H Point to the Manikin Heel Point on the depressed floor covering.
 L 48 MINIMUM KNEE ROOM - REAR. The minimum dimension from the Manikin knee pivot center to the back of the front seat back.
 L 3 REAR COMPARTMENT ROOM. The horizontal dimension from the back of front seat to front of rear seat back at height tangent to the top of rear seat cushion.
 W 4 SHOULDER ROOM - REAR. The minimum lateral dimension between the door garnish molding or nearest interference. Measured at H Point station.
 W 6 HIP ROOM - REAR. The lateral dimension through H Point to trimmed body surfaces. Depress loose side wall cloth to trim foundation or other obstruction when such construction exists.
 H 51 UPPER BODY OPENING TO GROUND - REAR. The vertical dimension from a point on the trimmed body opening to the ground, measured 13.0 inches forward of the H Point.

LUGGAGE COMPARTMENT DIMENSIONS

- V 1 LUGGAGE CAPACITY - USABLE. The total luggage compartment luggage capacity in cubic feet with the tire and tools in place, determined in accordance with the Passenger Car Luggage Space Standard, DD 0.00 - 105.
 H195 LIFTOVER HEIGHT. Vertical dimension from the highest point on the luggage compartment lower opening to ground, excluding corner radii.

STATION WAGON - THIRD SEAT DIMENSIONS

- W 85 SHOULDER ROOM - THIRD SEAT. The minimum lateral dimension between the door garnish moldings or nearest interference. Measured at H Point station.
 W 86 HIP ROOM - THIRD SEAT. The lateral dimension through H Point to trimmed surfaces.
 L 86 EFFECTIVE LEG ROOM - THIRD SEAT. Measured along a diagonal line from ankle pivot center to H Point plus a constant of 10.0 inches. With rear-facing third seat, foot is positioned in foot well or to nearest interference with rear end or rear closure.
 H 86 EFFECTIVE HEAD ROOM - THIRD SEAT. The dimension from H Point to the headlining, plus a constant of 4.0 inches. Measured along a line 8° to rear of vertical.

STATION WAGON - CARGO SPACE DIMENSIONS

- L202 CARGO LENGTH AT FLOOR - FRONT SEAT. The horizontal dimension, measured at the floor level from the rear of the front seat back to the normal inside limiting interference on the tailgate, on the car centerline.
 L204 CARGO LENGTH AT BELT - FRONT SEAT. The horizontal dimension measured from the top rear of front seat back to a vertical extension line from the normal inside limiting interference at the top of the tailgate, on the car centerline.
 W201 CARGO WIDTH - WHEELHOUSE. The minimum horizontal dimension, measured between wheelhouseings at floor level.
 W204 OPENING WIDTH AT BELT. The minimum horizontal dimension, measured between the nearest normal inside limiting interferences of the rear opening at the top of the tailgate.
 H201 MAXIMUM CARGO HEIGHT. The maximum vertical dimension, measured from the top of the floor covering to the headlining, on the car centerline.
 H202 REAR OPENING HEIGHT. The vertical dimension measured from the top of the floor covering to the normal inside limiting interference at the top of the rear opening, on the car centerline, with both tail-and liftgates fully open.
 V 2 CARGO VOLUME INDEX BEHIND FRONT SEAT. The total volume in cubic feet above the normal load floor and behind the front seat with the liftgate and tailgate closed.

W4xL204xH201

W203	REAR OPENING WIDTH AT FLOOR	50.70	53.66	53.66	
W204	OPENING WIDTH AT BELT	50.00	52.24	52.24	
W205	MAXIMUM REAR OPENING WIDTH ABOVE BELT	50.00	52.24	52.24	
H201	MAXIMUM CARGO HEIGHT	29.69	31.72	31.72	
H202	REAR OPENING HEIGHT	26.20	27.84	27.84	
H250	TAILGATE TO GROUND HEIGHT	26.54	24.03	24.17	
V2	CARGO VOLUME	66.00	91.12	91.12	

* For Dimension Definitions See Section E 1, SAE Aerospace - Automotive Drawing Standards,

- (1) 53.44 (1" Forward of Tailgate Pillar)
 (2) 2-Seat: 57.12 (1" Forward of Tailgate Pillar)
 3-Seat: 53.86 (8" Forward of Tailgate Pillar)

INDEX

SUBJECT	PAGE NO.
Automatic Transmission.....	16
Axis, Steering	20
Axle, Rear	17
Battery	12
Bearings, Engine	5, 6, 7
Belts - Fan, Generator, Water Pump	11
Brakes - Parking, Service Power	18, 19
Camber	20
Camshaft	6
Capacities	
Cooling System	11
Fuel Tank	10
Lubricants	
Engine Crankcase	8
Transmission and Overdrive	15, 16
Rear Axle	17
Car and Body Dimensions	
Width	1
Length	1
Height	1
Ground Clearance	1
Front Compartment	2
Rear Compartment	2
Luggage Compartment	2
Station Wagon - Third Seat	2
Station Wagon - Cargo Space	2
Carburetor	3, 9, 10
Caster	20
Choke, Automatic	10
Clutch - Pedal Operated	14
Coil, Ignition	13
Connecting Rods	5
Convenience Equipment	23
Cooling System	11
Crankcase Ventilation System	8
Crankshaft	6
Cylinders and Cylinder Head	4
Dimension Definitions	
Key Sheet	25
Exterior & Interior	26
Distributor - Ignition	13
Electrical System	12, 13, 14
Engine	
Bore, Stroke, Displacement, Type	4
Compression Ratio	4
Firing Order, Cylinder Numbering	4
General Information, H.P. & Torque	4
Lubrication	7, 8
Power Teams	3
Exhaust Emission Control	9
Exhaust System	8
Equipment Availability	22
Fan, Cooling	11
Filters - Engine Oil, Fuel System	8, 10
Frame	22
Front Suspension	21
Fuel, Fuel Pump, Fuel System	4, 10
Fuel Injection	10
Generator and Regulator	12
Glass	22
Height (Lamp)	14
Headroom	2
Weights - Car and Body	1
Horns	14
